

EMMANUEL KURINAAH

Associate Software Engineer · Full-Stack, Cloud & Applied AI

Avon, CT 06001 · (860) 790-3377 · emkurinaah@gmail.com · linkedin.com/in/emmakurinaah · github.com/manny239

EXPERIENCE

Travelers Insurance, Associate Software Engineer Jun 2025 – Present

Engineering Enablement, Corporate Technology · Hartford, CT

- Engineer a full-stack application to migrate the company's on-premises facility and parking platform to AWS, available to a global workforce of over 34,000 employees, spanning a React front end built on an internal design system, an Express (Node.js) API layer, and a PostgreSQL database.
- Provision and manage AWS infrastructure as code with Terraform, and configure self-hosted GitHub Actions runners to automate build and deployment pipelines for the platform.
- Design and document REST APIs to the OpenAPI specification with Zod schema validation, and author a Python service that ingests the corporate HR feed daily at 3 PM to keep employee records synchronized.
- Instrument observability with the ELK stack and safeguard data integrity through Liquibase database migrations and Vitest unit testing, sustaining over 92% code coverage.
- Conduct threat modeling and embed security best practices across the SDLC, identifying and remediating vulnerabilities before production release.
- Build agentic AI proofs of concept for department-wide use, including a learning game that uses the Agent-to-Agent (A2A) protocol to drive AI-powered NPCs that quiz employees on internal documentation, prototyped in Claude before production build.
- Architect a retrieval-augmented generation (RAG) system that tokenizes internal domain knowledge into a vector database for agent inference, retaining institutional expertise ahead of senior-staff departures.

Webster Bank, Software Engineer Intern May 2024 – Aug 2024

Southington, CT

- Built AI-driven document-extraction flows on AWS using Microsoft Power Automate and AI Builder, automating manual data entry in the syndicated-loan process.
- Delivered Agile stories across the full SDLC for a syndicated-loan processing release, tracked and prioritized in Jira.

SKILLS

Languages: JavaScript, TypeScript, Python, SQL, HTML/CSS

Frameworks & Libraries: React, Node.js, Express, Zod, Vitest, Liquibase

Cloud & DevOps: AWS (Lambda, S3, API Gateway, CloudFormation), Terraform, Docker, GitHub Actions, Jenkins, UrbanCode Deploy, CI/CD

Data & AI: PostgreSQL, vector databases, RAG, LLM integration, Agent-to-Agent (A2A) protocol, prompt engineering

Security, Testing & Observability: Threat modeling, 42Crunch, OpenAPI, REST API design, ELK stack, Agile/Scrum, Jira

EDUCATION

University of Hartford, B.S. Computer Engineering May 2025

Minors in Computer Science, Data Science & Mathematics · GPA 3.77 · West Hartford, CT

Tau Beta Pi Engineering Honor Society · President's List (6 semesters)

CERTIFICATIONS

Certifications: AWS Certified Cloud Practitioner · AWS Certified AI Practitioner · Lean Six Sigma Yellow Belt
